Humla Double Console

The Humla Series designed by the iconic Hans Bolling is timeless. Minimalism is maximised in this design. Stripping them to their bare essentials and so using the least material possible, and by doing so exposing their function beautifully. The simplicity of their design makes the Humla pieces immune to ageing. The three shelved console comes in natural oak or black and can easily double up as a room divider as well as handy shelving unit.

Dimensions

Console
